

flu.csv:

Influenza data from 23 wards in Tokyo, Japan (2009-2018). The historical raw data of Tokyo region was downloaded through Tokyo Metropolitan Infectious Disease Surveillance Center (Link: <http://survey.tokyo-eiken.go.jp/epidinfo/weeklyhc.do>).

Row: number of clinic visits **per ward** over **weeks**.

Column: number of clinic visits in 23 wards in the same week. Columns **1-54** are **2009** data, and so on.

network.txt:

Based on the geographic distribution of 23 wards and their adjacent relationship, a 23-node neighboring network model is constructed.
